

DESCRIPTION

Radiant Communications VL2200 Series are broadband optical receivers and the VL2300 are the broadband transmitters.

There are two versions of systems; 40 channel and 80 channel units. Both systems will transmit CATV signals from 20 MHz to 860 MHz in bandwidth. The VL2200/2300 broadband systems are designed to be used in small to medium campus links, which can incorporate high split couplers. They will transport up to 80 VSB-AM video channels up to 30 km while maintaining good Carrier to Noise and Carrier to Distortion parameters. Only available in 1310 nm.
